

YOUTH CONNECT

Towards empowering youth to take on the World!

A dream doesn't become reality with magic; it takes sweat, determination and hard work. It is as true as said. We are committed to build a school which will provide a seamless connect with daily routined life of people in the community and focus in inculcating, practicing and inspiring children to practice values of inclusion, respecting diversity, peace and harmony and environmental protection.

As mentioned in earlier newsletters, we have an energetic team of young architects from Chennai who are helping us with building the school with the same vision we have. They have been guiding us via phone and video calls by this time. But now they are finally on the site to help and accompany us in building the school. The whole of ALFA's team is working alongside labour with due passion and dedication they carry in their hearts for giving life to this mission.

We are done with a one-roomed volunteer house and are heading towards building mud blocks to construct the classrooms. With all the dedication and passion, we are looking forward to build an inclusive school for the children of the community.

Stamping the mud mixture to prepare base for mud blocks

Children of all age group attending the evening class

Evening classes

Education is the process of developing the ability to learn and apply the concepts in real life; and not about cramming the whole syllabus and get good grades in exams. From this month we started evening classes for children especially belonging to ages 4 to 12 to relearn the concepts they have studied in school in a practical and fun way.

Children are taught through various mediums such as short films, comprehensive songs and creative games the same concepts which they learnt in school theoretically. English and mathematics are the major subjects we take up in the class because these are considered the toughest among all. We will be starting with general awareness and current affairs classes very soon.

Stay tuned and contact for more information!

Important Highlights of the Month

- Admissions in the school for the upcoming academic year increased from 105 to 250 students.
- Real construction of the school has started.
- Evening classes got popularised and initially only 10-12 children attended the class but the number grew to 45 within just a few days.
